Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to a sealer, classified in class 219, subclass 607.
- II. Claims 21-30 drawn to a method of sealing, classified in class 219, subclass 604.
- III. Claims 31-41 and 53-71, drawn to a method of welding, classified in class 219, subclass 52.
- IV. Claims 42-52, drawn to a welder, classified in class 219, subclass 765.

The inventions are distinct, each from the other because of the following reasons:

Inventions both Groups I and IV and both Groups II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be performed by either a welder or a sealer.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
